

ATLAS / ADVERSARIAL RETRIEVAL FIXTURE

Current Atlas specification

This is a fictional test document. All names, dates and amounts are synthetic. Physical PDF page numbers are authoritative.

Atlas is a text-based document retrieval pilot operated by Meridian Lab. Its project owner is Lina Faris. The launch date is 17 March 2027.

Atlas uses Qdrant for vector storage, a local cross-encoder for reranking, and a local NLI model to check explicit claims. Atlas does not use an LLM API.

The current upload limit is 12 MB per PDF. The current retention period is 30 days. Uploaded documents are not retained permanently.

Atlas encrypts stored documents at rest. This document does not state that Atlas holds ISO 27001 certification.

ATLAS / ADVERSARIAL RETRIEVAL FIXTURE

Historical settings and nearby names

Historical record, superseded: before 1 February 2027, Atlas allowed 8 MB per PDF and retained files for 90 days. These are not the current limits.

A separate project named Atlas Blue is owned by Omar Salim. Atlas Blue launches on 21 April 2027. Atlas Blue is not the Atlas retrieval pilot.

The Atlas retrieval pilot has a budget of AED 48,750. Its contingency reserve is AED 3,250. The budget excludes the contingency reserve.

In the current Atlas pilot, the maximum number of retrieved candidates is 10, and the reranker returns 3 evidence chunks.

The word owner can refer to the project owner or the document owner. The document owner is Noor Rahman; the Atlas project owner is Lina Faris.

ATLAS / ADVERSARIAL RETRIEVAL FIXTURE

Access rules and exception

Atlas allows PDF access to members of the Cedar team only when their training is complete. A Cedar member without completed training is not eligible.

Members of the Birch team cannot access Atlas PDFs, even if their training is complete. Contractors cannot access Atlas PDFs.

Samira Nasser is a Cedar team member. Her training completion status is recorded on page 4.

No access password, API key or administrator credential is included in this document.

Page 3 contains access policy. The current PDF upload limit is stated on page 1, not page 3.

ATLAS / ADVERSARIAL RETRIEVAL FIXTURE

Training register and unsupported matters

Samira Nasser completed the required training on 9 March 2027. Combining this record with the access rules on page 3 establishes her eligibility for Atlas PDF access.

Yusuf Karim is a Birch team member and completed training on 8 March 2027. Completed training does not override the Birch access restriction.

No customer satisfaction percentage, uptime guarantee, investment return, or comparison against competing products is reported.

The document does not identify the capital of France or give medical advice. Such questions are outside its subject matter.

Atlas supports text-based PDFs only. Scanned image-only PDFs are unsupported. A future OCR feature is proposed but has not been implemented.
